

Certification readiness – Measurement tool for Consultants – July 2017

	1) Unmet Inconsistent 1-4	2) Met Frequent 5-7	3) Exceptional/ Consistent 8-10
<b>Attunement to client - Ability to perceive and appropriately respond to the self-states and emotions of others.</b>	Candidate often gets enmeshed or over-identifying with client's story, has a hard time separating themselves from the emotions of their client (i.e. dissociation (hypoaroused), flooding (hyperaroused), emotional dysregulation evident in consult)	Candidate seldom gets enmeshed or over-identified with their client's story and is aware when it occurs.	Maintains good boundaries between Candidate and client. Candidate can easily "feel" the emotions of client while not over-identifying, flooding, or dissociating.
<b>Treatment Plan - Able to establish a comprehensive treatment plan</b>	Treatment planning is difficult for candidate to comprehend, or consultant often disagrees with the treatment plan suggested by therapist.	Candidate can mostly put together a solid treatment plan, but is not consistent. Mostly agrees with personal LI therapist and consultant (i.e. therapist decides to start with PTSD when consultant feels that Baseline is needed first)	Candidate demonstrates good judgment with treatment planning and is often in agreement with consultant's ideas. Is able to show flexibility in using various protocols to address clients needs.
<b>Flexibility - Ability to accept one's difficulties, ask for help, and to accept feedback from LI consultant</b>	Candidate never to rarely asks for help or admits difficulties to consultant. Often presents as "having it all together". Feedback is often taken as an insult. Candidate has a hard time staying within their window of tolerance when receiving feedback.	Candidate asks for help, however, consultant believes that more questions are needed and there seems to be some holding back is evidenced.	Candidate is openly vulnerable with consultant about challenges and areas of growth they face. Candidate welcomes feedback from consultant and reports applying suggestions made by consultant.
<b>Baseline Protocol - Good understanding of Baseline protocol</b>	Often confuses protocol with others, has a hard time knowing what situations protocol is appropriately used.	Candidate knows the steps of the protocol, however sometimes gets confused about when it is appropriately used.	Can accurately articulate the steps of this protocol and has a clear understanding of when it is appropriately used.
<b>Birth to Present Protocol- Good understanding of Birth protocol</b>	Often confuses protocol with others, has a hard time knowing what situations protocol is appropriately used.	Candidate knows the steps of the protocol, however sometimes gets confused about when it is appropriately used.	Can accurately articulate the steps of this protocol and has a clear understanding of when it is appropriately used.

<b>Attunement protocol</b>	protocol is appropriately used.	about when it is appropriately used.	appropriately used.
<b>Attachment Repair Protocol – Good understanding of Attachment Repair protocol</b>	Often confuses protocol with others, has a hard time knowing what situations protocol is appropriately used.	Candidate knows the steps of the protocol, however sometimes gets confused about when it is appropriately used.	Can accurately articulate the steps of this protocol and has a clear understanding of when it is appropriately used.
<b>Standard Protocol- Good understanding of Standard protocol</b>	Often confuses protocol with others, has a hard time knowing what situations protocol is appropriately used.	Candidate knows the steps of the protocol, however sometimes gets confused about when it is appropriately used.	Can accurately articulate the steps of this protocol and has a clear understanding of when it is appropriately used.
<b>PTSD - Good understanding of PTSD protocol</b>	Often confuses protocol with others, has a hard time knowing what situations protocol is appropriately used.	Candidate knows the steps of the protocol, however sometimes gets confused about when it is appropriately used.	Can accurately articulate the steps of this protocol and has a clear understanding of when it is appropriately used.
<b>Script Clearing - Good understanding of Scripts Clearing protocol</b>	Often confuses protocol with others, has a hard time knowing what situations protocol is appropriately used.	Candidate knows the steps of the protocol, however sometimes gets confused about when it is appropriately used.	Can accurately articulate the steps of this protocol and has a clear understanding of when it is appropriately used.
